

eprosima::fastdds::
dds::TopicDataType

```
graph BT; alertPubSubType[alertPubSubType] --> TopicDataType[eprosima::fastdds::dds::TopicDataType]
```

The diagram illustrates a relationship between two C++ classes. At the bottom is a gray box labeled 'alertPubSubType'. A blue arrow points upwards from this box to a white box at the top labeled 'eprosima::fastdds::dds::TopicDataType'. This indicates that 'alertPubSubType' inherits from or is a specialization of 'eprosima::fastdds::dds::TopicDataType'.

alertPubSubType
